Summary:

Emerging Data Analyst, curious to put analytical and statistical skills in real-world projects. Harnessing the power of AI with a blend of R, Python, SQL, and BI tools to make an impact in this data-driven world. Leveraging the use of AI-assisted Development for creating data-friendly software systems to formulate AI-driven Data Analytics.

Education:

MS in Engineering Management

May 2027

University of Massachusetts Amherst

Relevant Coursework: 1) Descriptive Analytics (using R, Python, Statistics, and R-Studio)
2) Database Management for Analytics (using SQL, MS Access, Tableau)

Industry Experience:

AI-Analyst | Easytech Innovations

03/2025-06/2025

- Leveraged an AI-driven analytics tool to understand business insights and identified 3 revenue KPIs.
- Successfully managed large datasets (50000+ rows) and created reports for presentation.
- Developed AI-marketing strategies for the sale of 4 SaaS-based products, leveraging data-driven insights
- Generated \$25000 in AWS Credits through collaboration with experts and laid business growth initiatives.
- Volunteering as a Database Manager, I mined 20,000+ rows of the Education ERP system database using MySQL and R to clean inconsistencies and organize datasets for generating student academic performance reports.

Operations and Business Intelligence Intern | Vision Earthcare

09/2024-02/2025

- Pioneered the work on business intelligence and data analysis in the company from investment records, developed an MIS (dashboard), and found a \$6,000 discrepancy through financial reconciliation, reflecting business analytics skills.
- Managed 21 on-site projects, overseeing technical aspects, interacting with clients and business consultants, found 82 business tenders, crafted reports showcasing overall data-informed project management skills, and also enhanced interpersonal skills, including problem-solving, collaboration, and teamwork with critical thinking.

Skills:

Coding Proficiency: SQL, Python (Matplotlib, Pandas, Seaborn, NumPy, forecasting), R (dplyr, tidyr, ggplot2), Jupyter

Data Proficiency: Tableau, MS PowerBI, MS Access, MS Office (Word, Excel, PPT), Colab, ETL, Data Modeling

Other Skills: Visual Studio Code, Google Apps Script, Generative AI, UI/UX, Product Analytics, AWS, GitHub

Projects:

Descriptive Analytics with R – Healthcare Insights Project

Fall 2025 (Ongoing)

- Collaborating in a cross-functional team on medical datasets containing Electronic Health Records to analyze obesity trends, applying mathematics and descriptive statistics, including probability, ANOVA, correlation, regression, and clustering, while visualizing results for actionable healthcare insights using data science tools and RStudio

Speak_Data_Viz: A Voice to Visualization Platform

Sept 2025

- Architected a data analytics platform with automated data cleaning (25K+ records), speech-to-dataset conversion, SQL script generation, advanced chart visualizations, and instant Python and R code replication (<2s).

Real-Time Email Tracking System: Revolutionized Email Marketing with AI-driven Analytics

June 2025

- Engineered an AI-powered email tracking system that processed 45000+ of clean data using Python to track emails and generate a new dataset in a spreadsheet, demonstrating updated statuses of emails.

Data Analysis: A SQL-driven insights model

April 2025

- Analyzed food sales databases using MySQL to identify top-revenue-generating products and accordingly informed marketing strategies to maximize revenue growth, showcasing data analysis skills.

Healthcare Analytics for Blood Sugar Control: Analytical Intelligence

Jan 2025

- Calculated a 12-day sugar level reduction timeline by analyzing 15 days of blood sugar data using Excel, Lookup, pivot tables, and statistical analysis to recommend a daily optimal Insulin dosage to patients.

Certifications:

- Business Intelligence with Power BI
- Data Visualization
- Python for Data Analysis in Healthcare
